

Discover your home at Compart and conquer the digital future of customer communication with us as

Senior Java Developer*

Full time. Permanent. Now.

As an international IT company with 170 employees in Böblingen (Stuttgart area), we have been developing smart software solutions and bringing people, companies and systems together for over 25 years. Our goal is to optimize the added value of customer communication through modern platforms that process, distribute and make accessible documents and content of any type and format in any system and channel. We are a leading provider in the field of omnichannel communication management and inspire our customers with our innovative world-class technologies.

Your responsibilities:

- Independent contribution in an agile team working on the development of new products or on the further development of already existing, sophisticated medium and large scaled products
- Dealing with native web technologies and established standards with plenty of room for creativity and your own solutions
- Active contribution to the agile development process - in collaboration with our designers and product owners, as well as within a team during the implementation and the (unit) testing
- Mutual code reviews and pair programming, continuous integration and refactoring
- Providing information for our technical writers for the preparation of product documentation
- Overview of the building process and promotion of design and architecture
- Close cooperation with our product management and other teams in the entire software development process
- Minimum of 2-3 days/week in the office

Your profile:

- Successful study of informatics or comparable qualifications
- Strong basic knowledge of object orientation as well as relevant experience in software development with Java – at least 5 years
- Good knowledge in applying the Spring Frameworks, Unit Testing and agile software development processes
- Experience in JDBC, web services and XML
- Technological curiosity and the ability to analyze technical complexities independently
- Profound knowledge in the area of software architecture, Clean Code and database design
- Good knowledge of the English language

Our Benefits for You:

- | | | |
|--|--|--|
