

Discover your home at Compart and conquer the digital future of customer communication with us as

## Software Test Engineer\* in Testautomation

Full time. Permanent. Now.

As an international IT company with 170 employees in Böblingen (Stuttgart area), we have been developing smart software solutions and bringing people, companies and systems together for over 25 years. Our goal is to optimize the added value of customer communication through modern platforms that process, distribute and make accessible documents and content of any type and format in any system and channel. We are a leading provider in the field of omnichannel communication management and inspire our customers with our innovative world-class technologies.

### Your responsibilities:

- Responsibility for monitoring automated test execution and test results.
- Independent test maintenance and reproduction, incl. analysis and reporting of test deviations
- Independent further development of test automation
- Proactive optimization of the tests for the purpose of enhancement and long-term functionality
- Conception, creation and documentation of new test cases
- Active participation in agile teams (Scrum) and mutual technical support in the tester team
- Work with CI and versioning systems as well as WIKI and ticket systems

### Your profile:

- Successfully completed university studies (e.g. computer science, engineering)
- Ideally several years of professional experience in software testing or an ISTQB certification
- Programming experience in the automation of tests (e.g. with Groovy, Java, Typescript, REST-assured)
- Testing experience under operating systems such as Windows, Linux, AIX and Solaris with tools such as Bash and Batch as well as XML
- Solution oriented, analytical and structured way of working
- Ability to work in a team and strong communication skills
- Very good knowledge of the English language, in word and script. German language skills desired

### Our Benefits for You:

- |  |  |  |
|--|--|--|
|  Living and working by shared values such as integrity, trust, and respect |  International working environment, outstanding team spirit |  Flat hierarchies, short decision making processes, open door policy            |
