

For the reinforcement of our international IT company in Böblingen (Stuttgart area), we are looking for a

Software Test Engineer for Web Services*

for a permanent position.

We, the Compart AG are a leading provider of Document & Content Technology Solutions. Our software solutions, services and innovative world-class technologies enable our customers to process, share and access documents and data contents of any type and format in any arbitrary system or channel.

Your responsibilities:

- Responsible for testing web services for our programs and components in document and output management
- Configuration, development and implementation of automated tests
- Independent conception, development and maintenance of test cases
- Planning and proactive development of tests regarding extension options and long term functionality
- Checking and assessing deviations and performing retests
- Creating documentation of test cases and procedures
- Active participation in agile teams (Scrum)

Your profile:

- Successful study of informatics or comparable qualifications
- Ideally an ISTQB certificate
- Experience in the automation of tests for web services (e.g. Java/Groovy combined with SoapUI)
- Experience with tests of REST-services
- Knowledge of WIKI and ticketing systems
- Experience with CI- and version control systems preferable
- Solution oriented, analytical and structured ways of thinking
- The ability to work in a team and excellent communication skills
- Excellent knowledge of the German and/or English language, in word and script

Our benefits:

- | | | |
|---|--|--|
|  Living by values, such as integrity, trust and respect |  Opportunity of individual development (career) |  Flat hierarchies and short decision making processes |
|  Targeted training, In-house language courses |  Flexible working hours |  Free employee parking |
|  Free fruit and drinks, meal discount and company canteen |  Company wellness and sports programs |  Company and team events |
