Compart supports label and matrix printing

Tuesday, July 21, 2015

[Böblingen, July 21, 2015] – New output filter for label and matrix printing – Compart builds bridge to Industry 4.0

Compart has expanded its offering of output filters for label and matrix printing. All solutions of the DocBridge® family now support output on Zebra and Datamax devices as well as ESC/P-based dot matrix printers. This broadens Compart's expertise in the logistics/transport and production industries where label and matrix printing is absolutely essential. Zebra and Datamax devices are virtually ubiquitous in industrial manufacturing (goods receipt/shipping, inventory management, forwarding, pallets). ESC/P printers, on the other hand, are used mainly for printing specific industrial and regional forms (including customs and forwarding documents).

With the new filters, Compart creates a technological bridge between existing document and output management structures (legacy) and the growing digitalization in production for the value chain (Industry 4.0). Harald Grumser, founder and Chief Executive Officer (CEO) of Compart: "We are facing the dawn of a new age, which I believe will impact our lives even more than the invention of the printing press 500 years ago. The real and the virtual worlds are converging; factories and machines are electronically networked, as are customers, suppliers and manufacturers. This will undoubtedly affect document processing." Grumser maintains that manufacturing companies need to prepare documents and data streams of different types and formats as efficiently as possible for output on all physical and electronic channels, while leveraging their legacy structures. "Compart", continues the CEO, "has the right solutions".

Compart is one of the most experienced specialists in optimizing document, content and print data and guarantees the highest print quality, including for label and matrix printing, with the state-of-the-art technologies of its DocBridge® family of solutions.

Comparting, the forum for multi-channel document and content technologies on October 15th and 16th, 2015 in Böblingen Kongresshalle. For more information and to register, go to <http://www.compart.com/comparting>

For journalists: Press round table at Comparting on Thursday, October 15, 2015 at 2:30 p.m.

Background information on Compart

Compart is a leading international supplier of document and content technology solutions. The company, headquartered in Germany, has been a market presence for over twenty years and has subsidiaries in Europe and North America as well as a network of partners in Latin America.

Compart helps companies boost the efficiency of their operations with solutions for quick and flexible processing of high-volume transaction documents. The scalable and platform-independent DocBridge® family of products, designed, developed and supported by Compart, allows documents to be output anytime, anywhere, digitally or on paper.

The company enjoys a worldwide reputation as an innovative market leader as well as a developer of professional and leading-edge solutions in the field of document management. More than 1,200 customers in 42 countries rely on Compart solutions, in industries that range from finance, insurance, and retail to printers, telecommunications, utilities and healthcare. Furthermore, Compart is a technology partner for numerous leading manufacturers in the industry.
